

Yu-Hung (Edward) Wu

B.S. in National Taiwan University of Science and Technology, Computer Science and Finance

edward.0726@gmail.com · <https://marzear.github.io/> · +886-975-298-256

A senior college student and currently a machine learning engineer. Passionate about Natural Language Processing, Machine Learning, and FinTech. Fully prepared to bring the pro-active learning attitude and unwavering dedication to pursuing professional growth that contribute to my exceptional academic and internship performance.

Education

National Taiwan University of Science and Technology (NTUST), Taipei Sep. 2017 – Jun. 2021
B.S., Computer Science and Information Engineering and also Major in Finance

- Overall GPA: 3.87 | CS Major GPA: 4.03 | Finance Major GPA: 3.86 | last 2 year GPA: 3.96
- Participated in the following under-graduate researches:
 1. BERT-Based Visual Question Answering (VQA) (Advised by Professor Kuan-Yu Chen)
 2. Video Activity Recognition in Sports Videos (Advised by Professor Bi-Ru Dai)
 3. High frequency trading (An interdisciplinary project, Advised by Professor Wei-Zhong Miao)
- Obtain permission to take advanced courses open to upper-graders due to outstanding academic performance. For instance, I begin taking graduate courses from this semester.
- I got 4th place in NTUST Computer Science Department Class 2021 Graduate Project Competition.

Work Experiences

Asia Pacific Machine Intelligence Company (AP-MIC), Taipei Sep. 2018 – Mar. 2020
Chatbot Developer / Software Engineer Internship

- A business partner with Google, focus on developing chatbot engines.
- Participated in designing project structure.
- Implement many skills in chatbot to enhance the knowledges of the chatbot.
- Developed the concatenate system between Action on Google and our platform.
- Developed a COVID-19 chatbot, which had reached 82,000 conversation sessions.

Industrial Technology Research Institute, Taiwan Jun. 2020 – Current
Machine Learning Engineer Internship

- Responsible for building DRL-based dialogue system.
- Using PyDial to verify the reward of a dialogue.

Teaching Assistant of Data Structures Course, NTUST Aug. 2020 – Jan. 2021

- Become the teaching assistant in my advisor's course since I got "A+" in the course in 2018.
- Designed innovative programming assignments and helped students to solve the problems.

Technical Skills

Programming Languages

Python – 3+ years
C++, C – 2+ years
JavaScript, HTML, CSS – 2+ years
Node.js – <1 year
R – <1 year

Natural Language Processing

BERT and its applications
seq2seq applications
Transformer
Chinese Processing
Intent Classification

ML / Data Analysis Modules

RNN / CNN / GAN models
Tensorflow2, Keras
Numpy
Sklearn
Pandas

Full-stack Development

Django
Flask
Angular 6

Version Control

Git
Docker

Other

Web Crawler
Database Management
API Design

Competition Experiences

Post Office Big Data Competition - Reached the Semifinals

Apr. 2019 – Jun. 2019

E-sun Tbrain NLP Competition – 5th place (409 participants in total)

Jun. 2020 – Aug. 2020

Leadership Experiences

- Representative of computer science department in freshman orientation.
- Class representative in junior year.
- Team leader of course projects in full-stack development course, operating system course and software engineering course.

Languages

- Mandarin (native)
- English (fluent)
- Japanese (novice)
